

MONIER MASONRY PRODUCTS

Monier produces concrete masonry products from our facility at Rouna Quarries, 9 Mile in the National Capital District of Port Moresby. With a clear focus on quality our block and paver facility manufactures dimensionally accurate units that ensure our customers faster laying time and savings.

FINEST CONSTITUENTS

Using the best available constituents and production practices our masonry products are strong, durable and have good in-service performance.

Our Masonry products are tested to comply with AS/NZS 4455 which means quality and consistency is built into every unit we make. Monier can also manufacture non-standard sizes and shapes upon demand.

THE STANDARD RANGE

Monier's standard range of products includes :

- 100mm (4") Blocks - Standard, and solid, split rib.
- 150mm (6") Blocks - Standard, and lintel, channel clean out split rib.
- 200mm (8") Blocks - Standard, and bond beam, deep lintel, knockout, full and half height sill, channel, clean out knock out-clean out, biscuitless clean out, hollow, split rib, H block, half height standard, inspection cap, capping stone, livestock block piggery grate.
- 300mm (10") Blocks – channel square (cube), half.
- Unipave Paving – coloured and plain.
