

## MONIER QUARRY

***Monier Quarry Products is a leading aggregates producer supplying aggregates to large Civil construction, Asphalt, Concrete suppliers, as well as smaller projects such as residential landscaping. We strive to provide quality, cost-efficiency, and sustainability in all we do, and our aggregates and production techniques are no exception. Along with a complete product selection, Monier Quarry offers services including product transport delivery, technical support and specialist industry expertise.***

### LOCATION

Ideally located at 10 Mile Nebiri, within the National Capital District of Port Moresby, Monier's quarry has a proven track record of providing consistent quality products for more than 20 years.

### OPERATION

The complete quarry process is carried out through a state of the art comprehensive fixed plant that is operated and maintained by highly skilled Operators.

### PRODUCT

Our high capacity and modern crushing and screening operations allow us to supply a diverse range of quality quarry materials such as; aggregates, road bases and rock products to suit engineered specifications or customer requirements including:

- 20mm, 14mm and 10mm Sealing and Asphalt aggregates to Department of Works (DOW) specifications or Australian Standards (AS). Concrete Aggregates to Department of Works (DOW) specifications or Australian Standards (AS)
- Manufactured Sands and Fine Aggregates to DOW or AS requirements for concrete and asphalt.
- A range of Road bases including 20mm CBR80 and 40mm CBR60 road base to DOW and National Airports Corporation (NAC) requirements.
- Rock and Spall products.

Other specific rock products to meet project requirements are also manufactured upon request. These include;

- Armour Rock and Gabion
- Rock Spalls
- Ballast Filter Rock
- Drainage Aggregates
- Manufactured Sand

All specified quarry products are manufactured in bulk, with additional storage to ensure customer requirements are maintained in line with agreed product volumes. We have vast experience delivering small and large scale construction material projects with challenging specification and customer requirements.
