

MONIER PRECAST & PRESTRESSED CONCRETE

Monier owns and operates Precast facilities at Rouna Quarries 9 Mile in the National Capital District and have the capability to provide a full range of Precast and Prestressed Concrete Elements. Engineered designs or special customer requirements can be manufactured as high quality products that can be relied on with confidence.

Moniers quality system and experienced staff, ensure each element of design and specification requirements will perform well into the future.

FLEET DELIVERY & CUSTOM MADE PRODUCTS

Monier have a fleet of trucks available for all delivery requirements. Monier also provides standard and custom precast concrete products. The facility also has the capability of providing indoor casting to specific units, eliminating any delays due to weather.

MONIERS' RANGE OF PRECAST PRODUCTS INCLUDE

- Architectural and Engineered elements.
- Stahlton Engineered flooring system.
- Manhole, surrounds, lids, lintel beams, box culverts, gully pits and barriers.
- Step treads and others.

MONIER MISSION

Quality and Service in Precast Concrete exemplifies our commitment to providing the highest quality precast concrete products along with exceptional customer service. Our expertise, knowledge and problem solving abilities, allows us to provide solutions to meet our customers needs of both time and budget. Contractors can have confidence that a quality product will show up when agreed, ready to be installed. Monier can also consult and quote on your project's unique needs, and can adapt as job site condition changes are communicated.
